

Environmental Policy

Reynaers Limited are the UK division of the Architectural Aluminium Systems company, Reynaers Aluminium in Duffel, Belgium.

We recognise that our business activities impact upon the environment in a number of ways and we are committed to reducing the effect of these where possible. In particular, we are committed to:

- Regularly reviewing all stages of our operations in order to minimise our impact on the environment
- Prevention of pollution through management of our environmental risks
- A program of continual improvement
- Complying with relevant legislation and regulations and the environmental requirements of our customers.
- Continually improving our resource efficiency by using less energy and producing less waste. We will dispose of such waste in a safe and responsible way, re-using or recycling where applicable
- Regularly setting and reviewing environmental objectives and targets to reduce the impact of our significant environmental aspects.
- Where possible develop products that have a reduced environmental impact during their life cycle.

In order to achieve our commitment we have developed and implemented an Environmental Management System that meets the requirements of ISO 14001. This will be subject to regular review and audit to ensure continual effectiveness of environmental management at our organisation.

This policy is communicated to all employees, customers and suppliers and is freely available to the public.
