

Case Study: Capital East

Capital East, London Docklands

Aluminium curtain walling and window systems from Reynaers both feature on the grand scale project - Capital East.

Capital East is a luxury development of waterfront apartments and penthouses in the Royal Docks and adds a stunning new dimension to the transformation of the Docklands into one of the most exciting and dynamic parts of London.

Reynaers CW50 curtain wall was specified on the project and benefits from allowing maximum entrance of light into the building.

CW50 is a versatile system and is available in various finishes, such as standard capped, horizontally lined and structurally glazed. The extensive range offers technical solutions for the different performance requirements of a façade such as angled and vertical facades to faceted. The popular CW50 system has been tried and tested and meets various CWCT performance criteria.

Reynaers CS68 thermally improved, three-chamber window system was also used on the project boasting, an ideal combination of high insulation levels and optimum security.
