NEW ECO SYSTEM 75

A secure solution giving a perfect fit between the old and the new

In light of Reynaers' continuous investment in innovation, the Eco System range has been upgraded and now boasts a new variant - Eco 75, a window and door system specifically designed for the refurbishment market. Ideal for the replacement of timber and plastic, its 75mm deep outer frames make it particularly suitable for use on homes, schools and other public sector buildings. Eco System 75 has the following benefits:

- **Security** - the new Eco 75 offering meets the high quality standards set by the Secured by Design initiative - BS7950 1997
- **Flexibility** - Eco System 75 is available in 3 frame types: Squareline, Softline and Ovoline, a quarter round convex moulding used in classical architecture
- **Low maintenance** - aluminium has proved itself as a material with very low maintenance costs and a long life span especially in comparison with other materials
- **High performance** - the system offers a superior thermal performance to steel offering U values as low as 1.2 W/m²k, depending on the application.
- **Sustainability** - unlike timber and plastic, aluminium can be 100% recycled and can be used time and time again with no loss of quality. It can also be specified along with Rey-cycle; Reynaers' comprehensive Site Waste Management System

Flexibility

Eco 75 is available in a range of glass thicknesses from single through to triple glazing. The windows are internally beaded ensuring it meets the same standards as the Secured By Design initiative and permitting greater security and ease of glazing for high rise applications.

The system is a direct fix window, which minimises disruption and damage to reveals and decoration, making it ideal for school and hospital refurbishments.

Design

By achieving new for old in terms of aesthetics and sightlines, Eco 75 will aid the planning process whilst achieving maximum thermal efficiency.

For long life, cost effectiveness and superior performance combined with excellent aesthetic qualities, Eco System 75 represents the perfect solution for refurbishment projects.

Ovoline

Squareline

Softline

Performance

The Eco 75 product has been fully tested for Air, Water and Wind Resistance and meets the following standards:

Air - 600 Pa (class 4)

Water - 1200 Pa (class E1200)

Wind Resistance - 2400 Pa (class CE 2400)
