

THE PERFECT VISUAL MATCH

REYNAERS FIRE PRODUCTS

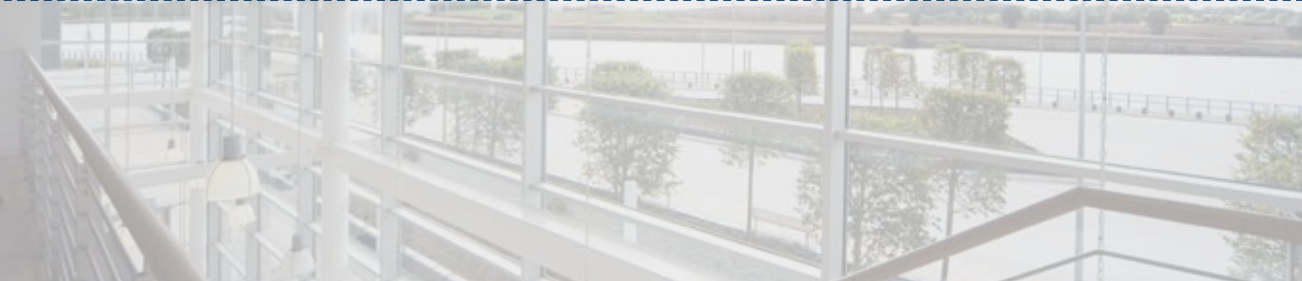

Meeting European safety standards
whilst providing a perfect visual match

Reynaers new fire resistant aluminium systems have been designed to provide a visual match with Reynaers non fire-rated products and are fully compliant with British and European safety standards. The systems provide architects and specifiers with real benefits, namely:

- **Reynaers Fire Partners** - only companies trained in the Reynaers Fire Products can manufacture and install the range, ensuring optimum quality
- **Fire Partners are all Firas accredited** - exceeding the legal requirement for the industry and ensuring that Reynaers' Partners meet the highest safety standards
- **Reynaers Fire Products provide a safe escape route for 30 or 60 minutes** - tested to EI30 & EI60, allowing safe evacuation
- **Single source supplier** - all glazed elements can now be covered by Reynaers unique insurance backed guarantee
- **Window, door and curtain wall options are now all available** - enabling fire-rated systems to be seamlessly integrated with Reynaers' non fire-rated products for the complete envelope package

THE PERFECT VISUAL MATCH

Reynaers CS77 FP is an extension of Reynaers popular CS77 range of profiles and accessories for windows and doors.

The CS77 fire resistant range is available as outward opening single and double doors, panic doors, combined fixed window elements and glazed partition walls. This extensive range of configurations, in addition to a large choice of accessories and locking devices, provides architects with the largest range of options and combinations on the market.

Reynaers CW50 FP is an addition to the market leading CW50 range with the product being rated to both EI30 and EI60. The high performing Fire Products utilise identical profiles and accessories to the existing ranges, enabling the perfect visual match with Reynaers non fire-rated products.

Reynaers Smoke and Heat Evacuation System

Also available in the Reynaers Fire Products range is the Smoke and Heat Evacuation System which is tested according to the EN12101-2 standard. It allows standard vents to be opened in the event of fire to facilitate smoke and heat evacuation from the building. It can be linked into the building management system for optimum performance.

For further information on our Fire Partners and Products go to www.reynaers.co.uk

Reynaers Aluminium is a leading innovative supplier of high-quality framed glazing systems for windows and doors, curtain walling, patio and swing-entrance doors, façade systems, brise soleil, conservatories, skylights, fly screens and systems for the incorporation of blinds and ventilation. Our aim is to achieve optimum effect in total façade construction - technically, aesthetically, economically and most importantly, ecologically.
