

Case Study: Azure Apartments

THE COOPERATIVE SUPERMARKET

REYNAERS BRINGS AZURE SPARKLE TO PLYMOUTH

Reynaers Aluminium has helped rejuvenate an area of the Hoe, Plymouth by providing curtain walling, sliding systems and thermally insulated windows and doors for a £17 million state-of-the-art residential scheme.

Overlooking Plymouth's stunning coastal views, the Azure Project is situated on a previously derelict historic area of Plymouth's Hoe and comprises 109 exclusive apartments and penthouses. It has three separate sets of linked apartments with spacious terraces, many of which face due South with uninterrupted views across Plymouth Sound.

The project was designed by Architects Design Group (ADG), after winning a design and tender competition in association with Devington Homes, who specialise in the creation of high profile residential projects. Developed by Ardmore Construction Ltd, these contemporary apartments represent the very highest level of luxury; with a fully glazed walkway elevation to link the individual apartments with spacious, airy and light filling terraces and extensive underground car parking.
