

# BIM Studio: Registration and installation

- ° BIM Studio is free for architects, contractors and designers.
- ° You can use BIM Studio as a Revit plugin or a standalone application.
- ° Unzip the zip file and follow the installation procedure.
- ° Open BIM Studio from Windows/Mac OS or Revit. An additional ribbon will appear in the Revit environment. Use your email address and password to log in to BIM Studio.
- ° If you don't create an account, you will only get access to the limited demo version.
- ° Follow the instructions for use

# BIM Studio: Registration and installation

## 01 Go to the Reynaers webpage and download BIM Studio

### BIM Studio

Concept and design phase

As a project progresses from the concept phase to the design phase, more complex configurations are needed. BIM Studio is a free configurator that simplifies the creation of those complex BIM models.

This is where BIM Studio offers you a next level of flexibility. With this free Reynaers Aluminium design software, you can configure any type of window, door or sliding window. Start from a Reynaers Aluminium system, choose the preferred grid, add openings, make certain profile choices and simulate different colour options. During your design, you can flexibly adjust your building connection while the  $U_w$  value is automatically calculated as you go.

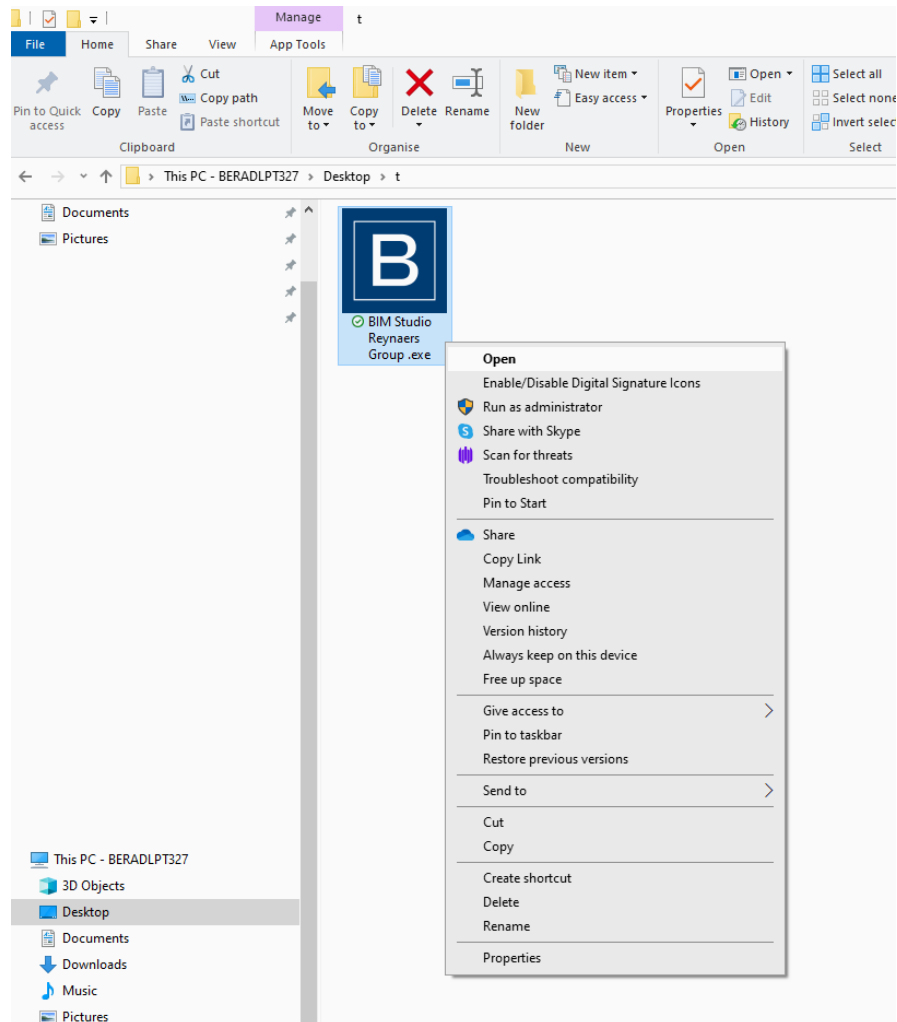

Finally, you can directly insert the configured models into your full BIM project.

- Enables to create more detailed, specific and complex BIM models
- User can choose level of detail
- Free download
- Short registration required
